PROFESSIONAL SUMMARY

Full-stack software engineer specializing in the **JavaScript/TypeScript** ecosystem (**React, Next.js, Node.js**), **Java** backend development, and **Python/FastAPI**, with hands-on **enterprise experience** delivering a live construction-management platform. Comfortable owning features end to end, from **secure authentication** and API design to applied **AI/ML integration**, and shipping them to cloud infrastructure on **Azure**. **Uses AI-assisted development** tools to accelerate delivery while remaining the **sole architect and decision-maker** on every system built. Final-year BSc (Hons) Software Engineering student seeking an **Associate Software Engineer** role to bring production experience, a versatile technical stack, and strong secure-development practices.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, Kotlin, Dart, PHP, C/C++, SQL, HTML/CSS

Primary Stack

Frontend: React, Next.js, Vite, Redux, Zustand, Tailwind CSS, Framer Motion, Three.js

Backend & Architecture: Node.js, Express.js, Java (Spring Boot), Python (FastAPI), RESTful API Design, Microservices, OOP

Databases: MongoDB, PostgreSQL, Neon DB, MySQL, Firebase, Database Design & Query Optimization

AI & Agentic Systems: LangGraph, Ollama (Local LLMs), RAG (ChromaDB), Multi-Agent Systems, LLM-as-a-Judge Evaluation

Cloud & DevOps: Azure DevOps, Docker, Git/GitHub, Vercel, Render, CI/CD (GitHub Actions)

Additional Skills

Mobile Development: Kotlin, Flutter, React Native

Other Full-Stack: PHP, Laravel

Integrations & Tools: Twilio, Cloudinary, Nodemailer, Postman

Testing & Practice: Jest, Cypress, JUnit, Selenium, OWASP ZAP, Agile/Scrum, Secure Development, Testing & Debugging

AI-Assisted Development: Use AI coding tools (e.g., GitHub Copilot, Claude) to accelerate implementation and improve efficiency, while independently owning architecture, system design, and all engineering decisions

PROFESSIONAL EXPERIENCE

Software Engineer Intern | Visionex Digital Pvt Ltd

Apr - Dec 2025 (9 Months)

SAS Connect: Construction Management Enterprise Application | React, Next.js, Spring Boot, PostgreSQL, MongoDB, Firebase, Tailwind CSS, Azure DevOps, Auth0

- Advanced reporting:** Engineered scalable **Timesheet and Work Hours reporting** features with canonical ID filtering, pagination, and backend CSV/Excel file-streaming, streamlining manual export workflows for internal teams.
- Security architecture:** Deployed **two-factor authentication**, global **JWT handling**, and shared role-check utilities to enforce strict access control across client and server architectures.
- API optimization:** Normalized **complex payloads** and mapped relational data across services to minimize API transformation errors and improve data consistency.
- UI & UX performance:** Introduced **Zustand-based state stores** and **optimistic UI updates**, eliminating stale caches and heavy component re-renders to deliver instant, responsive UI interactions.

PROJECTS

Uni Finder: AI-Powered Educational Guidance Platform for Sri Lankan Students | Individual Research Project

2026

React, Tailwind, MongoDB, Python, FastAPI, Azure, GitHub Actions | Live: unifinderlk.vercel.app

- Independently designed and built a **hybrid-architecture platform** helping Sri Lankan A/L students identify suitable state university degree programs based on their subject stream, results, and personal preferences.
- Engineered a **hybrid AI search system** combining NLP-based matching with rule-based filtering to align student profiles with UGC-compliant degree programs across state universities.
- Integrated **Explainable AI** (LLM-based) to generate transparent, personalized reasoning behind each recommended academic pathway.

- Owned the full system end to end as sole architect and developer: backend microservices, database design, frontend UX, and cloud deployment via Azure and GitHub Actions CI/CD.

Shopping Eye: Mall Navigation & AI Guidance Platform | Personal Project

React, Node.js, MongoDB, Express.js, Three.js, Tailwind CSS | GitHub: [Shopping-Eye](#)

- Built a shopping mall navigation assistant featuring a **3D interactive shop finder**, **AI chatbot guidance**, and real-time information updates on the MERN stack.

AstroGuard: Autonomous NEO Threat Detector | Individual Project

May 2026

Python, LangGraph, Ollama (Local LLM), ChromaDB (RAG), Folium/Leaflet.js, NASA APIs | GitHub: [Autonomous-NEO-Threat-Detector](#)

- Designed and built a **4-agent LangGraph pipeline** powered by a local Ollama LLM, autonomously fetching live NASA NEO telemetry, computing impact physics, retrieving historical context via RAG (ChromaDB), and rendering interactive geospatial threat maps.
- Engineered a **self-reflective retry loop** and NASA SEDAC Web Map integration to auto-correct output errors and offload heavy rendering to the client browser under local hardware constraints.
- Built an automated test suite, including an **LLM-as-a-Judge evaluation pattern**, to verify output consistency across the full pipeline.

Full-Stack MERN Platforms | Hotel Management | Garbage Collection

- Architected full-stack MERN web platforms integrating **automated booking flows** and **QR-code scanning**.

Community Care & Donation App | Flutter & Firebase Mobile Application

- Developed a cross-platform Flutter and Firebase mobile app for community care and donations, featuring volunteer social profiles, **real-time networking**, and **donation tracking**.

EDUCATION

BSc (Hons) Information Technology, specializing in Software Engineering | Sri Lanka Institute of Information Technology (SLIIT), Malabe 2022 - Expected Sep 2026

Relevant Modules: Data Structures & Algorithms, OOP, Software Architecture, Secure Software Development, Distributed Systems, Deep Learning, Machine Learning, Mobile Application Development, UI & UX Engineering, DB Management Systems

Python for Beginners & Web Design for Beginners | University of Moratuwa - Centre for Open & Distance Learning (CODL) 2022

Diploma in English Language: Merit Pass | Britishway English Academy, Nittambuwa 2022

G.C.E. Advanced Level: Physical Science | President's College, Minuwangoda 2021

Subjects: Combined Mathematics, Physics, Information & Communication Technology
